

AquaPress AP-410 Pressure Transmitter -- Datasheet

PRODUCT SUMMARY

The AquaPress AP-410 is a high-performance pressure transmitter designed specifically for water and wastewater treatment applications. Engineered for durability and reliability, the AP-410 provides accurate pressure measurements in harsh environments. With advanced sensor technology and robust construction, this transmitter ensures long-term stability, making it an ideal choice for both industrial and municipal applications. Its user-friendly interface and compatibility with various control systems further enhance its flexibility and ease of integration.

KEY SPECIFICATIONS

- Measurement Range: 0 to 10 bar
- Accuracy: $\pm 0.5\%$ of full scale
- Output Signal: 4-20 mA or RS485 digital communication
- Power Supply: 12-30 V DC
- Temperature Range: -20 to 80 degrees Celsius
- Material: 316 stainless steel housing
- Protection Class: IP68
- Process Connection: 1/2" NPT or 1" Flange options
- Calibration: Factory calibrated, user-selectable zero and span adjustments
- Weight: 0.5 kg

ORDERING INFORMATION

AquaPress AP-410 Model Code Options:

- AP-410-10B: Standard model with 0 to 10 bar range
- AP-410-20B: Extended model with 0 to 20 bar range
- AP-410-MA: Model with 4-20 mA output
- AP-410-RS: Model with RS485 digital communication
- AP-410-NPT: 1/2" NPT process connection
- AP-410-FLA: 1" Flange process connection

For additional customization options, please consult with your AquaPress representative.
